For the 2007-08 school year, the AMAM has received funding from the Ohio Arts Council to assist regional school districts in bringing elementary, middle, and high school students to attend exhibitions at the museum and to ensure that young people could take advantage of the AMAM's growing educational programming.

The grant application process is straightforward. Interested schools need only submit an application letter from the school district and a quote from the transportation company used by the school district determining offset costs associated with sending students/school district to an Arts-in-Education program. Notification and dispersal of grants usually occurs within two weeks of receipt of request. Generally, grants will cover up to 50% of the total transportation costs.
