Feminism. A Movement to End Sexual Oppression

There is no getting around it: After all this time, the term "feminism" remains a political minefield. The idea that women want to be associated with a movement that has been so controversial and that has been so often misunderstood and misrepresented is not always an attractive proposition. Reformation in European Institutions

The Reformation, initiated by Martin Luther in 1517, was a pivotal moment in European history. It challenged the authority of the Roman Catholic Church and led to the establishment of Protestant denominations. This movement was characterized by a desire for a return to the original teachings of the Bible, freedom from churchsmanship, and the establishment of churches independent of the Roman Catholic Church. The Reformation had profound implications for European history, shaping the political, social, and religious landscape of Europe for centuries to come.
